Notes for Computer Networking Principles (EC2004LS) Practical Examination

The Licensee has to standby the Access Point User Manual and arrange an approved subject expertise to be presented when the ITE's appointed personnel carries out the configuration of router one working day before the practical examination.

Notes for Electronic Communications System (EC3002LS) Paper 1 Practical Examinations

1. The Licensee has to prepare a holding room for candidates who are waiting to their turns to take Paper 1 practical examinations by Group. There is no holding requirements for candidates between relays for the other module practical examinations.
2. Similar to the other practical examinations, the Marker is also doubled up as Invigilator for EC3002LS Paper 1 practical examinations in the examination room. The PE should arrange one invigilator (from Licensee) at the holding area to ensure that the candidates do not communicate to those who have completed their Paper 1 examination and not using the electronics and communication devices.
3. All candidates have to report at the examination venue by 8:30am. Different Groups have different examination start time with maximum of two candidates per Group.
4. For each Group, the candidates start with Part A examination (40 minutes) at workstation placed with measurement equipment before they are moved to another workstation to carry on with their Part B examinations (50 minutes).
5. Once the candidates complete their Paper 1 practical examination, they can leave the examination venue. They need to return and report at the examination venue at least 30 minutes before Paper 2 examination start time.
6. After the Marker has assessed each Group for Paper 1 Part A examination, the Presiding Examiner/Steward has to reset the equipment for next Group's use.
