

ELITC Newsletter

May 2026

Inside:

Get a first look at our expansion into new industries, our ERF-approved diploma, and global E-learning platforms. Plus, explore 90% funding for Enterprise Transformation Projects and save the dates for our AGM and Charity events.

Introducing E-Learning

We've officially signed an MOU with an overseas counterpart to broaden our e-learning delivery. This strategic collaboration allows us to offer innovative, borderless digital education. Look out for more updates in the coming months on how this exciting partnership will benefit our learners worldwide!

We believe in the power of continuous learning. That is why we are incredibly proud to announce that our training catalog has expanded to include over 3,000 course titles awarded by Continuing Professional Development (CPD)! Whether you are an organization looking to upskill your entire workforce or a professional ready to take the next step in your career, our extensive library has exactly what you need.

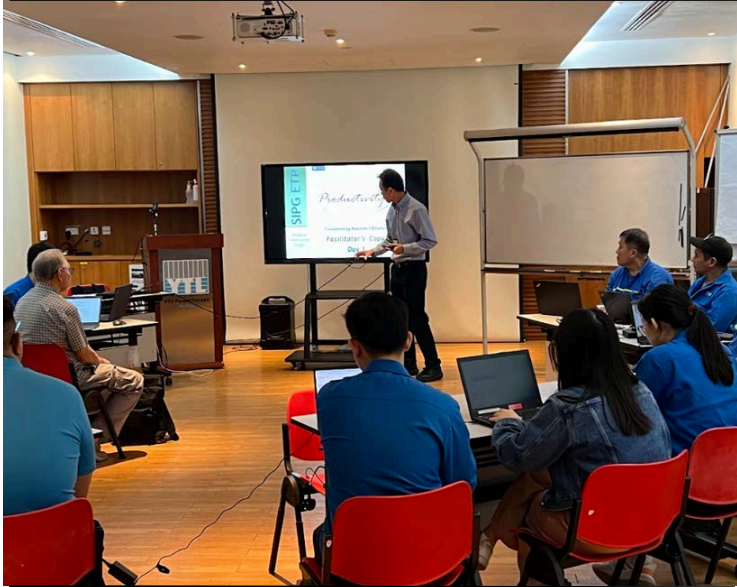

Feature Spotlight

A Major Milestone: We Are Expanding!

We are thrilled to announce a significant milestone for ELITC. We have officially received approval from the Registry of Societies (ROS) with no objection for us to extend our services beyond the electronics industry.

We are thrilled to announce that we will be broadening our educational offerings with a brand-new diploma program later this year! Fully approved under the Enhanced Registration Framework (ERF), this upcoming course assures a high standard of academic quality and industry relevance. Keep an eye out for our official launch date and curriculum details.

We are delighted to announce the **continued availability of IAP**, which has officially been extended by SSG for another two years. Available to anyone in the manufacturing sector, this national-level assessment pathway provides a direct route to upgrading your workforce while helping to defray your foreign worker levy costs.

The Enterprise Transformation Project:

Looking to streamline your operations and improve productivity? Through the Enterprise Transformation Project, your company can receive up to 90% funding to do exactly that. We utilize a powerful blend of training and consultancy to get you results across a comprehensive 6-day program. First, we provide 3 days of training necessary to understand the best tools and techniques for your industry. Then, we dedicate 3 days of consultancy to work alongside you, applying those new skills directly to your workflows and ensuring you know exactly how to streamline your processes effectively.

We Provide Tailor-Made Training: Customised Programmes for Your Team

We know that every business is unique, and sometimes a one-size-fits-all approach just doesn't work. Beyond our extensive catalog of courses, we specialize in building fully Customised Programmes designed specifically around your organization's goals. Whether you need to close a specific skills gap, align training with your corporate values, or blend our e-learning platforms with in-person workshops, our experts will work with you to design a training roadmap that delivers exact results.

"We can tailor it to meet the needs of each organisation."
- Mr Neo Aik Khiong,
Managing Director of ELITC

AI Technology Programmes

We are gearing up to launch an exciting new course on intuitive AI tools that will completely change how you build software. Keep an eye out -more details coming soon!

Join Us! Upcoming AGM & Charity Month

Get ready for a season of impact! We're committed to providing valuable insights and meaningful opportunities for our community. Join us at the AGM to review our shared goals and milestones, then help us give back and make a lasting difference during Charity Month. Mark your calendars for these exciting events:

**JUN
2026**

Annual General Meeting

Discover what's next for us in June at our Annual General Meeting. We will be reviewing our shared successes from the past year and mapping out exciting new initiatives. Don't miss this opportunity to connect with leadership and have your voice heard!

**DEC
2026**

Charity Month

Giving back is at the heart of what we do. Starting December, we are dedicating a full day to community support. We've previously had the honor of working alongside NKF, the Singapore Red Cross, and the Singapore Cancer Society, and we are incredibly excited to reveal our next charitable partner soon.

Championing Respect for Copyright

We are proud to announce that ELITC has officially been awarded as reseller by the Copyright Licensing and Administration Society of Singapore (CLASS) which ensures full copyright compliance on any resources used in analysis, education, research, training, and operational purposes.

Ensure compliance: consult ELITC to confirm your copyright licence for everyday operations.

Mr Neo Aik Khiong Managing Director

At ELITC, we proudly recognize our Managing Director, whose leadership drives our core mission of continuous skills upgrading.

His unwavering support for our corporate partners, especially within the manufacturing sector, ensures we remain a vital catalyst for technical excellence.

"Our fundamental mission at ELITC is to support the industry through continuous skills upgrading. As we look forward to the rest of the year, we remain deeply committed to providing unwavering support to our corporate partners, especially those in the manufacturing sector."

Industry Preview Program: Connecting Youth with Leaders

We are incredibly proud to share that on 28 Jan 2026, we invited two industry experts to speak at ELITC! Backed by e2i, our Industry Preview Program successfully provided our ITE interns and young jobseekers with the exact real-world insights needed to inspire and guide their future career journeys.

Joining us from Skyworks Global was Ms. Silver Lim, a dedicated Training Specialist with a passion for workforce development. Ms. Lim took the stage to provide a comprehensive overview of the industry and highlight current career opportunities. Her presentation offered crucial job market insights, beautifully showcasing Skyworks Global's strong commitment to identifying and nurturing future talent in the manufacturing field.

We were deeply honored to feature Ms. Jucy Tan, Technical Training Senior Manager at STMicroelectronics, as a key speaker. Drawing from her extensive leadership experience, Ms. Tan shared invaluable industry insights directly with our ITE interns and young jobseekers. Her session successfully bridged the gap between classroom theory and real-world application, giving the audience a realistic and exciting first look into the dynamic world of modern manufacturing.

After wrapping up the Talk at ELITC, together with the ITE interns and young jobseekers, we headed over to UTAC for an immersive Learning Journey! The group was given firsthand exposure to the modern manufacturing industry. Highlights included a guided plant tour of the USG1 facilities, insights from UTAC's engineering team, and a dedicated networking session to explore future career and internship pathways.
